## COMUNICADO DE IMPRENSA

Lisboa, 4/11/2015

- **The EU at the G20 summit in Antalya: Presidents Juncker and Tusk set out the EU's agenda**

At the 10th edition of the G20 leaders' meeting taking place in Antalya from 15 to 16 November 2015, the European Union will be represented by President of the European Commission, Jean-Claude **Juncker** and the President of the European Council, Donald **Tusk**. Commissioner Pierre **Moscovici**, responsible for Economic and Financial Affairs, Taxation and Customs will accompany the two Presidents to the G20 and High Representative for Foreign Affairs and Security Policy/Vice-President Federica **Mogherini** will also be there to take part in an informal meeting of Foreign Ministers of G20 countries. Ahead of the Summit, in a [joint letter](#) sent to EU Heads of State and Government, Presidents **Juncker** and **Tusk** set out the EU's agenda for the G20 meeting. High on the list of priorities will be a collective response to the refugee crisis; continuing to deliver on the jobs, growth and investment agenda; promoting youth employment and social inclusion; moving forward on the G20's work on tax transparency and pushing for political momentum for trade opening as well as for a strong outcome in the UN negotiations on climate change. The two Presidents will hold a joint pre-Summit press conference on Sunday, 15 November 2015 at 10:30 (tbc) local time. We will have a pre-Summit off-the-record background briefing (for accredited journalists) in Brussels on Tuesday 10 November 2015 at 10:30 (exact time tbc) by the EU's G20 Sherpa. Both will be available on [EbS](#).

- **EUROSTAT: A range of indicators monitoring progress made in the EU to tackle climate change**

Energy, transport and increased human intervention in the environment have proven to be major contributors to climate change over the last few decades. The European Union (EU) has actively been pursuing ambitious emission reduction targets for years. The UN Climate Change Conference taking place in Paris in December 2015 (COP21) illustrates the global political importance of climate change, energy security and sustainable transport, three topics that have become increasingly interconnected. On the occasion of the publication of the 2015 [Energy, transport and environment statistical book](#) and with regard

to the forthcoming COP21 in Paris, Eurostat, the statistical office of the European Union, publishes a small selection of data on energy, transport and environment in the EU related to climate change. These data show that while primary consumption of energy stood in 2013 at its early 1990s level, renewables have increased their share in final energy consumption and greenhouse gas emissions decreased over the same time period. A Eurostat press release can be found [here](#).

- **EUROSTAT: Industrial producer prices down by 0.3% in both euro area and EU28**

In September 2015, compared with August 2015, industrial producer prices fell by 0.3% in both the euro area (EA19) and the EU28, according to estimates from Eurostat, the statistical office of the European Union. In August 2015 prices decreased by 0.8% in the euro area and by 0.9% in the EU28. In September 2015, compared with September 2014, industrial producer prices fell by 3.1% in the euro area and by 3.8% in the EU28. A Eurostat press release can be found [here](#).
